# Delivering single integration to cover all financial transaction needs of insurers

Your medium & long-term results are heavily impacted by how well you manage the financial complexity around policies (recurring collections, claims payouts, chargebacks, and refunds). We enable you to solve these challenges through one integration for a wide range of customers, regions, and business units.

## 1 integration = 1 ecosystem

Integrating with Imburse means making the whole payments ecosystem available to any person in your organization within a few clicks.

## Powerful payment rule automator

Imburse empowers insurers to automate payment rules for every customer, region, and business use case with just four clicks.

## Syncs with your CRM & ERP systems

We provide advanced reporting via the ops portal, webhooks, and REST API to keep your systems in sync.

## Enterprise-grade support

We provide a flexible support model as per the client's needs. We offer three levels of support through tailored SLAs.

## Provides optimal insurance collection & payout coverage

Imburse provides the most optimal and relevant payment coverage to insurers across borders.

## Leading industry experts

Our competency team helps insurers make the most out of the payments ecosystem.

## Success story

### Single integration for better CX and ROI

Nagarro redesigned the insurance platform of a global provider of insurance services and integrated it with the Imburse ecosystem.

With just one integration, the company is now offering new payment options to customers and abiding by regulations. It is currently **saving 6-digit figures** by avoiding multiple integrations and reducing maintenance activities substantially.
